

PATENT
Atty. Dkt. No. ROC920000064US1
PS Ref. No.: IBM2K0064

IN THE SPECIFICATION:

Please replace the paragraph at Page 7, Lines 22-33 with the following amended paragraph:

The description field 310 comprises text describing the URL chain or some aspect thereof. The description may be provided by a user, be a default description based on, for example, text within a base URL or other text. This field is useful in identifying, in a manner beneficial to the user, the purpose or intended resolved resource of the chained URL. The base URL 320 comprises the base URL of the URL chain. The browser size field 340 stores data indicative of the size of a browser window suitable for displaying the resource resolved by the base URL. The use browser size field 350 stores a flag indicative of whether the data in the browser size field 350 should be used to size a browser window or frame. The retrieve all components field 360 stores a flag indicative of whether all components within the chain records 330 should be retrieved to resolve the desired resource before processing subsequent portions of the URL chain.
